

Home Together – Cube finishing

Using the configuration as shown outline each pattern of the six as outlined by the red line. Backstitch in Soie 100/3 or PC – I use these as they come as one strand and seem to lift off the fabric a bit so it is easier to finish, but certainly floss can be used.

Trim to ½” seams.

Interface all 6 pieces with heavy interfacing or high loft interfacing.

Using the outline as a guide finger press the seams and then iron so they are flat.

Whip stitch all the outlined seams together with a like coloured floss of your outline.

Stuff firmly – use some plastic pellets for weight on the bottom and then lots of dry stuffing.
